FIRE WEATHER FORECAST

NAME: WILLOW FIRE

FORECAST #5

UNIT: CA-LPF-001493

SHIFT: FRIDAY- JUNE 25, 2021

SIGNED: 

Pete Curran - IMET

TIME / DATE ISSUED: 1800hrs Thurs 6/24/21

WEATHER DISCUSSION:

Building high pressure over the Pacific Northwest will result in a warming and drying trend starting today and extending into early next week with the potential for triple-digit heat over the weekend. RH minimums will also fall into critical levels with teens and single digit RH's by Sunday. Higher than average temperatures will continue into early next week before returning to more seasonal values by midweek. Terrain-driven winds will prevail over the fire today with south-southwest winds over the higher terrain and ridges-tops.

FRIDAY: Mostly sunny after morning clearing with less marine air intrusion.

MAXIMUM TEMPERATURE (deg F):

86-92 degrees

MINIMUM RELATIVE HUMIDITY:

18-23%

20 FOOT WINDS:

Light and variable drainage winds 3-5mph early, increasing south/southwest winds 6-10mph in the afternoon with gusty afternoon winds near 20mph over the higher elevations and ridgetops.

TRANSPORT WINDS: West at 8mph

LAL: 1

CHANCE OF WETTING RAIN: 0%

INVERSION: Marine layer inversion near 3000ft.

FRIDAY NIGHT: Warmer and dryer and less marine air intrusion. Patchy low clouds.

MINIMUM TEMPERATURE (deg F):

66-73 degrees

MAXIMUM RELATIVE HUMIDITY:

43-53%

20 FOOT WINDS:

West/southwest winds 4-8mph, gusting to 20mph in the early evening, then transitioning to diurnal slope winds after 9pm. Light southwest flow on the more exposed ridges overnight.

TRANSPORT WINDS: West 5mph

LAL: 1

CHANCE OF WETTING RAIN: 0%

INVERSION: Shallow marine inversion.

SATURDAY OUTLOOK:

An expanding ridge of high pressure will bring hot temperatures over the fire area Saturday and Sunday near 100 degrees along with very low RH into the low teens and single digits. Mostly light to moderate terrain-driven winds will prevail over the lower elevations of the fire with west-southwest winds gusting to near 20mph over the higher elevations. High pressure aloft will compress the marine layer and result of less marine air intrusion than the past several days and result in poorer RH recovery. Temperatures will cool some on Monday with more seasonal weather expected by midweek.

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 6	TYPE OF FIRE: Wildfire
FIRE NAME: Willow	OPERATIONAL PERIOD: June 25, 2021 Day
DATE ISSUED: June 24, 2021	TIME ISSUED: 1900
UNIT: Los Padres National Forest	Prepared: Dan Felix, FBAN 

INPUTS

**** See Incident Weather Forecast for discussion and specific weather. ****

WEATHER SUMMARY:

Mostly Sunny

Temp: Highs of 86-92 degrees.

RH: Minimum 18-23 percent.

Winds: Light and variable slope winds early, becoming south/southwest 6-10, gusts to near 20 in the afternoon.

GENERAL

The Fuel Moisture profiles across much of the nation are "off the charts" with records being set for Energy Release Component, 1000-hour fuels, etc. Here on the Central Coast the indices had already exceeded record values for this time of year. The recent favorable weather has caused a reduction in the fire danger indices to just under record values for this time of year, but we are now in a weather regime that will send the indices back in to record levels. The terrain is very steep and convoluted. This not only hampers accessibility; it also gives the fire many chances to set up for rapid uphill runs as it finds places to come into alignment with sun, wind, and slope. The terrain winds are likely to dominate spread direction deep in the canyons, and the prevailing wind will influence the ridges. Pay close attention to the effect of the marine layer, if any, on the fire.

Specific:

DIVS L, W/Z – The weather has taken a turn that will increase the potential fire activity. The heat sources continue to diminish, but those that remain should start to be more readily apparent earlier in the day. These continue to be a concern due to the potential any escape in these areas have to find slopes in alignment and spread to the north and east. Of particular concern is the area of Whiskey/Zulu that is too rugged for boots on the ground.

DIVS A, G, – The south and west flanks of the fire are holding very well and are not expected to cause any problems. However, keep an eye on this area since it is exposed to the ridge winds. An escape on the west flank would promote further spread to the north. Again, there are areas too rugged for ground troops that will need to be closely monitored.

Air Operations: No major issues are anticipated.

SAFETY

The weather is getting hotter and drier, and you all know what that means.

"The opportunity of defeating the enemy is provided by the enemy himself." – Sun Tzu

Willow Fire SAFETY MESSAGE

INCIDENT: Willow Fire CA-LPF-001493

DATE: 6-25-26, 2021

0700-0700

Major Hazards and Risks:

- Driving and vehicle operations on all roads to and from the fire area.
- Rolling material and rocks
- Aircraft
- Weather

Driving as safe as if your family were in the vehicle.

While driving to and from the incident, keep headlights on, fasten your seatbelts, and follow posted speed limits. Watch for wildlife, they show up out of nowhere. When the engine is running there will be no cell phone use while operating vehicles and equipment.

Defensive driving can be and is a life saver.

A picture is worth a thousand words.

Do you have a plan in place for an extraction in the event of any injury?

Weather observation...

The cool weather the last 4 days has been great, but that doesn't mean we let our guard down. It means we pay closer attention to everything around us. Post look outs and identify escape routes and safety zones.

Be safe

Directing Bucket Drops:

Make sure you give general location on incident. Give location with clock position from pilot's perspective. Make sure you have a plan when speaking to the pilot. Make sure all personnel are clear of water drops.

CA-Team 11 Type 2 Safety Officers, /S/ Tom Sherman, and John Bates

Human Resource Message

All I really need to know I learned in Kindergarten by Robert Fulghum

Robert Fulghum believes wisdom is not obtained at the highest level of the education mountain, it is learned in the sand pile out on the playground in kindergarten. These are the things Robert Fulghum learned:

- 1. Share everything.*
- 2. Play fair.*
- 3. Don't hit people.*
- 4. Put things back where you found them.*
- 5. Clean up your own mess.*
- 6. Don't take things that aren't yours.*
- 7. Say you're sorry when you hurt somebody.*
- 8. Wash your hands before you eat.*
- 9. When you go out into the world, watch for traffic, hold hands and stick together.*

HRSP: Linda Overton 707-373-7631

You can find me at the end of Trailer Row

STOP AND READ

**TODAY OR IN THE PAST 24 HOURS
HAVE YOU HAD ANY OF THE
FOLLOWING SYMPTOMS UNEXPLAINED
BY FIRE SUPPRESSION?**

- FEVER OR CHILLS?
- COUGH?
- SHORTNESS OF BREATH OR DIFFICULTY BREATHING?
- FATIGUE?
- MUSCLE OR BODY ACHES?
- HEADACHE?
- NEW LOSS OF TASTE OR SMELL?
- SORE THROAT?
- CONGESTION OR RUNNY NOSE?
- NAUSEA OR VOMITING?
- DIARRHEA?

IF YES TO ANY OF THE ABOVE,

DO NOT ENTER!

CALL THE MEDICAL UNIT LEADERS AND
WAIT FOR MEDICAL ATTENTION

How to treat **Poison Ivy, Oak, & Sumac**

1

Wash all exposed areas
well with dish soap.
The sooner the better.

2

Apply calamine lotion and
take oral antihistamines to help
with itching and blistering.

3

Place cool, wet compresses on
the affected area for 15 to 30
minutes several times a day.

4

Try not to scratch the
rash. Scratching could
cause a skin infection.

5

Wash all clothing, shoes,
and other items that had
contact with the plant.

(near Safeway)

*It is a cash only, self-serve, coin-op
laundry mat. Hours 0600-2100

Resource Advisor Message:

- **Protecting Natural and Cultural Resources**
 - Avoid all areas flagged with Black and Blue flagging
- **Wildlife: When Dipping & Drafting Water**
 - The hose should be equipped with ¼" mesh so you do not pull up small fish and amphibians with the needed water.
 - Draft from the deepest sections of ponds, when possible.
 - Store fuel and toxic materials away from water.
 - Dipping from Big Sur Coast – keep clear of kelp beds.
- **Things to be Concerned About:**
 - Follow MIST guidelines – “Light hand on the land.”
 - Dozer lines in riparian zones.
 - Retardant in riparian zones (not less than 300’).
 - Water drafting in steelhead trout habitat.
 - Backfiring through riparian areas.
 - Clearing woody debris out of streams.
 - Heavy equipment or petroleum in water.
 - Dipping or drafting in red-legged frog.
 - Use of truck washing stations.

FIRELINE GUIDANCE FOR ARCHAEOLOGICAL AND HISTORIC SITES

1. Please be aware that prehistoric and historic sites may be situated within areas of line construction. Sites tend to be situated along ridge lines, saddles and low-relief land forms, stream terraces, creek sides and springs, rock outcrops and side-slope terraces which are less than 30%. Sites may also be in the vicinity of oak, pine, and juniper vegetation communities. Watch for rock outcrops and boulders that may have milling features (bedrock mortars, grinding slicks), artifacts may be present in surrounding soils. Historic sites may include rock foundations, milled wood, and old trash deposits.
2. If you observe cultural resources, attempt to avoid if possible and inform a Resource Advisor.
3. Leave all artifacts in place. Some artifacts may have been intentionally placed for religious or ceremonial reasons. Federal laws also prohibit the removal of artifacts on public lands. These laws hold enforceable penalties.
4. If you cannot avoid, attempt to minimize disturbance as much as possible, only clearing the surface to as minimal depth as necessary.
5. If possible, please note locations of cultural resources encountered in the field on a map and describe the location and type of site. Please provide this information to a resource specialist so it can be properly recorded and monitored.
6. If you encounter a burial or human remains, contact resource specialists as soon as possible so that we may notify Tribal representatives to determine the appropriate treatment of the remains.
7. Be mindful and careful in areas associated with historic mining. Constructing line in these areas may pose risks such as old mine shafts, abandoned equipment, and hazardous materials.
8. If possible, culturally sensitive locations will be flagged in the field with a combination of black/blue stripe flagging. If you encounter an area that has been flagged, please try to avoid. If you cannot avoid, and time allows, ground-disturbing activities will need to be monitored by resource specialists.

Thank you, Resource Personnel

Medical Incident Report

FOR A **NON-EMERGENCY INCIDENT**: WORK THROUGH CHAIN OF COMMAND TO REPORT AND TRANSPORT INJURED PERSONNEL AS NECESSARY.

FOR A **MEDICAL EMERGENCY**: IDENTIFY ON SCENE POINT OF CONTACT BY NAME AND POSITION AND ANNOUNCE "MEDICAL EMERGENCY" TO INITIATE RESPONSE FROM COMMUNICATIONS

Use the following items to communicate situation to communications/dispatch.

1. CONTACT COMMUNICATIONS / DISPATCH (Verify correct frequency prior to starting report)

Ex: "Communications, Div. Alpha. Stand-by for Emergency Traffic."

2. INCIDENT STATUS: Provide incident summary (including number of patients) and command structure.

Ex: "Communications, I have a Red priority patient, unconscious, struck by a falling tree.

Requesting air ambulance to Forest Road 1 at (Lat./Long.)

"This will be the Division W Medical, POC is TFLD Jones. EMT Smith is providing medical care."

Severity of Emergency AND Transport Priority (Priority 1, 2, 3)	<input type="checkbox"/> RED / PRIORITY 1 Life or limb threatening injury or illness. Evacuation need is IMMEDIATE <i>Ex: Unconscious, difficulty breathing, bleeding severely, 2° – 3° burns more than 4 palm sizes, heat stroke, disoriented.</i> <input type="checkbox"/> YELLOW / PRIORITY 2 Serious Injury or illness. Evacuation may be DELAYED if necessary. <i>Ex: Significant trauma, unable to walk, 2° – 3° burns not more than 1-3 palm sizes.</i> <input type="checkbox"/> GREEN / PRIORITY 3 Minor Injury or illness. Non-Emergency transport <i>Ex: Sprains, strains, minor heat-related illness.</i>
Nature of Injury or Illness & Mechanism of Injury	Brief Summary of Injury or Illness (Ex: Unconscious, Struck by Falling Tree)
Transport Request	Air Ambulance / Short Haul/Hoist Ground Ambulance / Other
Patient Location	Descriptive Location & Lat. / Long. (WGS84)
Incident Name	Geographic Name + "Medical" (Ex: Trout Meadow Medical)
On-Scene Point of Contact	Name of on-scene POC of Incident within an Incident (Ex: TFLD Jones)
Crew Patient Care	Name of Care Provider (Ex: EMT Smith)

3. INITIAL PATIENT ASSESSMENT: Complete this section for each patient as applicable (start with the most severe patient)

Patient Assessment: (IRPG PAGE 106)	Age:	Weight:	Chief Complaint:
--	------	---------	------------------

Skin Signs: (color/moisture/temp)	Level of Consciousness:	BP:	HR:	Respirations:
-----------------------------------	-------------------------	-----	-----	---------------

Treatment:

4. TRANSPORT PLAN:

Evacuation Location (drop point, intersection, helispot, Lat. / Long, hazards)	Patient's ETA to Location:
--	----------------------------

5. ADDITIONAL RESOURCES / EQUIPMENT NEEDS:

Paramedic / EMT - Crews - Immobilization Devices - AED - Oxygen - Trauma Bag - IV/Fluid(s) - Splints - Rope rescue - Wheeled litter - HAZMAT - Extrication

6. COMMUNICATIONS: Identify State Air/Ground EMS Frequencies and Hospital Contacts as applicable

Function	Channel Name/Number	Receive (RX)	Tone/NAC *	Transmit (TX)	Tone/NAC *
COMMAND					
AIR-TO-GRND					
TACTICAL					

7. CONTINGENCY: Considerations: If primary options fail, what actions can be implemented in conjunction with primary evacuation method?
Be thinking ahead.

8. ADDITIONAL INFORMATION: Updates/Changes, etc.

REMEMBER: Confirm ETA's of resources ordered. Act according to your level of training

Be Alert - Keep Calm - Think Clearly - Act Decisively

*** Follow up with MEDL upon return to ICP ***
